This is fine. What did it cost ? It needs to be added to our fixed asset inventory.

Rion Hobby Gardener Series Greenhouses: Attractive, Durable, Expandable and Easy No-Tool Assembly! The durable frame is constructed from UV protected PVC resin and held together with push-n-fit resin connectors. The twin walled polycarbonate panels offer superior strength, safety, light diffusion and heat isolation. The Rion Greenhouses can withstand winds of up to 80 mph and have been tested to support a 1,100 lb snow load! **All this quality** plus an easy, no-tool assembly make a Rion Greenhouse perfect for the growing enthusiast's needs.

Subject: RE: Donation of greenhouse from Education Foundation

By copy of this letter I will ask Pat to list it on the agenda. As back up it would be great if we had the cost and building specifications along with some pictures (brochure pictures are fine). If someone could get that info to Pat asap, it would be much appreciated.

Subject: Donation of greenhouse from Education Foundation

Good morning-

I believe that the Board needs to formally accept the donation of the greenhouse that has been constructed at Union High School with funds given by the Township of Union Education Foundation. That probably should be on the September agenda. If you need any further information, please contact me.

Thanks-

Susan Lipstein
