

TOWNSHIP OF UNION PUBLIC SCHOOLS

Grade 5 Mathematics

Adopted December 17, 2017

Updated December 18, 2018

Mission Statement

The mission of the Township of Union Public Schools is to build on the foundations of honesty, excellence, integrity, strong family, and community partnerships. We promote a supportive learning environment where every student is challenged, inspired, empowered, and respected as diverse learners. Through cultivation of students' intellectual curiosity, skills and knowledge, our students can achieve academically and socially, and contribute as responsible and productive citizens of our global community.

Philosophy Statement

The Township of Union Public School District, as a societal agency, reflects democratic ideals and concepts through its educational practices. It is the belief of the Board of Education that a primary function of the Township of Union Public School System is to formulate a learning climate conducive to the needs of all students in general, providing therein for individual differences. The school operates as a partner with the home and community.

Course Description

This course is designed to cover all 5th grade New Jersey State Learning Standards as well as introduce skill sets needed to be successful in the 6th grade course. The fifth grade math curriculum is currently aligned with the NJLS. All skills required for mastery are a part of the fifth grade learning goals. All lessons are created to address differentiated learning styles to ensure each lesson's objective is obtained by each student. The fifth grade curriculum focuses on five critical areas: (1) Number and Operations in Base 10; (2) Number and Operations - Fractions; (3) Operations and Algebraic Thinking; (4) Measurement and Data; (5) Geometry.

Recommended Textbooks:

GoMath – Grade 5

Curriculum Units:

Unit 1: Understanding the Place Value System

Unit 2: Understanding Volume and Operations on Fractions

Unit 3: More Operations on Fractions

Unit 4: Coordinate Geometry and Classifying Figures

Pacing Guide:

- Unit 1: Understanding the Place Value System.....9 weeks
- Unit 2: Understanding Volume and Operations on Fractions.....10 weeks
- Unit 3: More Operations on Fractions.....10 weeks
- Unit 4: Coordinate Geometry and Classifying Figures...9 weeks

I. Unit Standards Overview

Overview	Standards for Mathematical Content	Unit Focus	Standards for Mathematical Practice
Unit 1 Understanding the Place Value System	<ul style="list-style-type: none"> • 5.OA.A.1 • 5.OA.A.2 • 5.NBT.A.1 • 5.NBT.A.2* • 5.NBT.B.5* • 5.NBT.B.6 • 5.NBT.A.3 • 5.NBT.A.4 	<ul style="list-style-type: none"> • Write and interpret numerical expressions • Understand the place value system • Perform operations with multi-digit whole numbers and with decimals to hundredths 	MP.1 Make sense of problems and persevere in solving them. MP.2 Reason abstractly and quantitatively. MP.3 Construct viable arguments and critique the reasoning of others. MP.4 Model with mathematics. MP.5 Use appropriate tools strategically. MP.6 Attend to precision. MP.7 Look for and make use of structure. MP.8 Look for and express regularity in repeated reasoning.
Unit 1: <i>Suggested Open Educational Resources</i>	<u>5.OA.A.1 Using Operations and Parentheses</u> <u>5.OA.A.1 Watch out for Parentheses I</u> <u>5.NBT.A.1 Which number is it?</u> <u>5.NBT.A.1 Millions and Billions of People</u> <u>5.NBT.A.3 Placing Thousandths on the Number Line</u> <u>5.NBT.A.4 Rounding to Tenths and Hundredths</u> <u>5.NBT.B.5 Elmer's Multiplication Error</u>		
Unit 2 Understanding Volume and Operations on Fractions	<ul style="list-style-type: none"> • 5.MD.C.3 • 5.MD.C.4 • 5.MD.C.5 • 5.NBT.B.5* • 5.NF.A.1 • 5.NF.A.2 • 5.NF.B.3 • 5.NF.B.4 	<ul style="list-style-type: none"> • Understand concepts of volume • Perform operations with multi-digit whole numbers and with decimals to hundredths • Use equivalent fractions as a strategy to add and subtract fractions • Apply and extend previous understandings of multiplication and division 	
Unit 2: <i>Suggested Open Educational Resources</i>	<u>5.MD.C.5 Breaking Apart Composite Solids</u> <u>5.MD.C.5a using Volume to Understand the Associative Property of Multiplication</u> <u>5.MD.C.5b Carl's Aquarium</u> <u>5.MD.C Box of Clay</u> <u>5.NF.A.1 Making S'Mores</u> <u>5.NF.A.2 Do These Add Up?</u> <u>5.NF.A Measuring Cups</u> <u>5.NF.B.3 How Much Pie?</u> <u>5.NF.B.4b Chavone's Bathroom Tiles</u>		
Unit 3 More Operations on Fractions	<ul style="list-style-type: none"> • 5.NF.B.4b • 5.NF.B.5 • 5.NF.B.6 • 5.NF.B.7* 	<ul style="list-style-type: none"> • Apply and extend previous understandings of multiplication and division • Understand the place value system • Perform operations with multi-digit whole 	

	<ul style="list-style-type: none"> 5.NBT.A.2* 5.NBT.B.7* 5.MD.A.1 	<p>numbers and with decimals to hundredths</p> <ul style="list-style-type: none"> Convert like measurement units within a given measurement system 	<p>MP.1 Make sense of problems and persevere in solving them.</p> <p>MP.2 Reason abstractly and quantitatively.</p>

Grade 5

- Reteach/Enrich Supplemental worksheets (to help classify different abilities)
- iReady Teacher Toolbox activities
- Small group direct instruction for struggling learners -One-on-one instruction (as needed)
- Communicating in pairs, small group, or whole group presentations
- Teacher observation
- Student reflections/quick-writes on a particular lesson/skill
- Homework
- Daily Math Journal (Word Problem of the Day)
- Inquiry-oriented and exploratory approach
- Goalbook Pathways
- Standards Mastery

- Digital Personal Math Trainer
- iReady Diagnostic / Growth Check
- Ed Connect / Benchmark Test
- ECR – Extended Constructive Response
- PARCC- style assessments

Focus Mathematical Concepts

Prerequisite skills: Reading and writing whole numbers up to the hundred thousands place; recall multiplication and division facts up to 12; divide multi-digit number by one digit; read and write decimals to the hundredths place

Common Misconceptions: Students learn multiplication and division facts up to 12, but there is poor recall, therefore drills are needed.

Number Fluency (for grades K-5):

Grade	Required Fluencies
K	Add/Subtract within 5
1	Add/Subtract within 10
2	Add/Subtract within 20
3	Add/Subtract within 1,000 ; Multiplication and Division Facts 0-10
4	Fluently add and subtract multi-digit whole numbers using the standard algorithm; Multiplication and Division Facts 0-12
5	Fluently add and subtract multi-digit whole numbers; Multiplication and Division Facts 0-12; Add and Subtract Benchmark Decimals and Fractions

District/School Tasks

Exemplar tasks or illustrative models could be provided.

- Animated Go Math models
- GO Math iTools

District/School Primary and Supplementary Resources

District/school resources and supplementary resources that are texts as well as digital resources used to support the instruction.

- Interactive Student Edition

- Grab and Go Differentiated activities (Go Math)
- Using technological resources and other 21st century skills to support and enhance mathematical understanding
- Using connections between pictures, oral language, written symbols, manipulative models, and real-world situations

- Personal Math Trainer
- Math On the Spot video
- Real World Videos
- iReady Teacher Toolbox
- Illustrative Math <https://www.illustrativemathematics.org/>
- The Teaching Channel. <http://www.theteachingchannel.org>

Suggested Modifications

Below is a list of suggested modifications, accommodations, and enrichment opportunities. This includes, but is not limited to,;

1. English Language Learners.
 - a. Read written instructions.
 - b. Model and provide examples
 - c. Extended time on assessments when needed.
 - d. Establish a non-verbal cue to redirect student when not on task.
 - e. Students may use a bilingual dictionary.
 - f. Conversion chart
2. Special Education/504 Students.
 - a. Extended time on assessments when needed.
 - b. Preferred seating to be determined by student and teacher.
 - c. Provide modified assessments when necessary.
 - d. Student may complete assessments in alternate setting when requested.
 - e. Establish a non-verbal cue to redirect student when not on task.
 - f. Maintain strong teacher / parent communication.
 - g. Conversion chart
3. Gifted and Talented Students
 - a. Provide enrichment activities to expand upon the curriculum.
 - b. Use higher level questioning techniques in class and on assessments.

New Jersey Student Learning Standards - Technology

- 8.1.8.A.2 Create a document (e.g. newsletter, reports, personalized learning plan, business letters or flyers) using one or more digital applications to be critiqued by professionals for usability.
- 8.1.8.A.3 Use and/or develop a simulation that provides an environment to solve a real world problem or theory.
- Use of Edconent, iReady.
- Visit the Challenges index <http://www.figurethis.org/challenges>
- Students can explore the math inherent in a chosen career path <http://www.mathapprentice.com/>

Suggested Modifications

Below is a list of suggested modifications, accommodations, and enrichment opportunities. This includes, but is not limited to, :

1. English Language Learners.
 - a. Read written instructions.
 - b. Model and provide examples
 - c. Extended time on assessments when needed.
 - d. Establish a non-verbal cue to redirect student when not on task.
 - e. Students may use a bilingual dictionary.
 - f. Conversion chart
2. Special Education/504 Students.
 - a. Extended time on assessments when needed.
 - b. Preferred seating to be determined by student and teacher.
 - c. Provide modified assessments when necessary.
 - d. Student may complete assessments in alternate setting when requested.
 - e. Establish a non-verbal cue to redirect student when not on task.
 - f. Maintain strong teacher /parent communication.
 - g. Conversion chart
3. Gifted and Talented Students
 - a. Provide enrichment activities to expand upon the curriculum.
 - b. Use higher level questioning techniques in class and on assessments.

New Jersey Student Learning Standards - Technology

- 8.1.8.A.2 Create a document (e.g. newsletter, reports, personalized learning plan, business letters or flyers) using one or more digital applications to be critiqued by professionals for usability.
- 8.1.8.A.3 Use and/or develop a simulation that provides an environment to solve a real world problem or theory.
- Use of Edconenct, iReady.
- Choose an appropriate webquest project from this site: <http://www.mathgoodies.com/Webquests/sports/>
- Play the game “One to Ten” <http://theproblemsite.com>
- Working with fractions – <http://math-play.com/math-fractions-games.html>
- Students create a game for practicing fractions in SMART Notebook. <http://www.k-5mathteachingresources.com/5th-grade-number-activities.html>

Career Readiness Practices

- CRP1. Act as a responsible and contributing citizen and employee.
- CRP2. Apply appropriate academic and technical skills.
- CRP4. Communicate clearly and effectively and with reason.
- CRP6. Demonstrate creativity and innovation.

- CRP8. Utilize critical thinking to make sense of problems and persevere in solving them.
- CRP11. Use technology to enhance productivity.

NJSLS 9.2 - Career Awareness, Exploration, and Preparation

9.2.8.B.3 Evaluate communication, collaboration, and leadership skills that can be developed through school, home, work, and extracurricular activities for use in a career.

<ul style="list-style-type: none"> 5.MD.A.1. Convert among different-sized standard measurement units within a given measurement system (e.g., convert 5 cm to 0.05 m), and use these conversions in solving multi-step, real world problems. 	<p>MP.1 Make sense of problems and persevere in solving them. MP.2 Reason abstractly and quantitatively. MP.5 Use appropriate tools strategically. MP.6 Attend to precision.</p>	<p>Concept(s): Measurement units can be converted within a given measurement system. Students are able to:</p> <ul style="list-style-type: none"> convert from one measurement unit to another within a given measurement system (e.g., convert 5 cm to 0.05 m, convert minutes to hours). solve multi-step, real world problems that require conversions. <p>Learning Goal 9: Convert standard measurement units within the same system (e.g., centimeters to meters) in order to solve multi-step problems.</p>

<p>Unit 3 Grade 5 What This May Look Like</p>	
<p>Formative Assessment Plan</p>	<p><i>Formative assessment informs instruction and is ongoing throughout a unit to determine how students are progressing against the standards.</i></p> <p>- Self-assessment</p>
<p>Summative Assessment Plan</p>	<p><i>Summative assessment is an opportunity for students to demonstrate mastery of the skills taught during a particular unit.</i></p> <p>- Chapter Review</p>

- Fluency Fact Quizzes (Multiplication/Division facts)
- Formative tools throughout each chapter based on EACH new skill taught (given BEFORE the mid-chapter checkpoint AND after, also given BEFORE Go Math Chapter Test)
- Reteach/Enrich Supplemental worksheets (to help classify different abilities)
- iReady Teacher Toolbox activities
- Small group direct instruction for struggling learners -One-on-one instruction (as needed)
- Communicating in pairs, small group, or whole group presentations
- Teacher observation
- Goalbook Pathways
- Standards Mastery

- Mid-chapter Checkpoints
- Chapter Test (Ch.3,4,5,7,8,10)
- Standards Assessment
- Performance Assessment Task
- Digital Personal Math Trainer
- iReady Diagnostic / Growth Check
- Ed Connect / Benchmark Test
- ECR – Extended Constructive Response
- PARCC- style assessments

Focus Mathematical Concepts

Districts should consider listing prerequisites skills. Concepts that include a focus on relationships and representation might be listed as grade level appropriate.
 Prerequisite skills: Students should be able to identify common multiples and factors. Students should be able to multiply and divide whole numbers. Students should be able to simplify fractions. Students should understand place value of the decimal system.

Common Misconceptions: Students confuse factors and multiples. Students often add the denominators instead of finding a common denominator. Students confuse the multiplication and division process of fractions. Students confuse the decimal rules for each operation.

Number Fluency (for grades K-5):

Grade	Required Fluencies
K	Add/Subtract within 5
1	Add/Subtract within 10
2	Add/Subtract within 20
3	Add/Subtract within 1,000 ; Multiplication and Division Facts 0-10
4	Fluently add and subtract multi-digit whole numbers using the standard algorithm; Multiplication and Division Facts 0-12
5	Fluently add and subtract multi-digit whole numbers; Multiplication and Division Facts 0-12; Add and Subtract Benchmark Decimals and Fractions

District/School Tasks

Exemplar tasks or illustrative models could be provided.

<p>multiply, and divide decimals to hundredths, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used. *(benchmarked)</p>	<p>quantitatively. MP.3 Construct viable arguments and critique the reasoning of others. MP.4 Model with mathematics. MP.5 Use appropriate tools strategically. MP.7 Look for and make use of structure.</p>	<p>Students are able to:</p> <ul style="list-style-type: none"> • add and subtract decimals to hundredths using concrete models and drawings. • multiply and divide decimals to hundredths using concrete models and drawings. • add, subtract, multiply, and divide decimals to hundredths using strategies based on place value, properties of operations, and/or the relationship between addition and subtraction. • relate the strategy to the written method and explain the reasoning used. <p>Learning Goal 6: Add, subtract, multiply, and divide decimals to hundredths using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; explain the reasoning used, relating the strategy to the written method.</p>
<ul style="list-style-type: none"> • 5.NF.B.7. Apply and extend previous understandings of division to divide unit fractions by whole numbers and whole numbers by unit fractions. *(benchmarked) <p>5.NF.B.7c. Solve real world problems involving division of unit fractions by non-zero whole numbers and division of whole numbers by unit fractions, e.g., by using visual fraction models and equations to represent the problem. <i>For example, how much chocolate will each person get if 3 people share 1/2 lb of chocolate equally? How many 1/3-cup servings are in 2 cups of raisins?</i></p>	<p>MP.1 Make sense of problems and persevere in solving them. MP.2 Reason abstractly and quantitatively. MP.3 Construct viable arguments and critique the reasoning of others. MP.4 Model with mathematics. MP.5 Use appropriate tools strategically. MP.6 Attend to precision. MP.7 Look for and make use of structure. MP.8 Look for and express regularity in repeated reasoning.</p>	<p>Concept(s): No new concept(s) introduced</p> <p>Students are able to:</p> <ul style="list-style-type: none"> • use a story context to interpret division of a unit fraction by a whole number. • use a story context to interpret division of a whole number by a unit fraction. • divide unit fractions by whole numbers to solve real world problems, using visual fraction models and equations to represent the problem. • divide whole numbers by unit fractions to solve real world problems, using visual fraction models and equations to represent the problem. <p>Learning Goal 7: Solve real world problems involving division of unit fractions by whole numbers or whole numbers by unit fractions.</p>
<p>Unit 4 Grade 5 What This May Look Like</p>		
<p>District/School Formative Assessment Plan</p>		
<p><i>Formative assessment informs instruction and is ongoing throughout a unit to determine how students are progressing against the standards.</i></p> <ul style="list-style-type: none"> - Self-assessment - Fluency Fact Quizzes (Multiplication/Division facts) - Formative tools throughout each chapter based on EACH new skill taught (given BEFORE the mid-chapter checkpoint AND after; also given BEFORE Go Math Chapter Test) 	<p>District/School Summative Assessment Plan</p>	
<p><i>Summative assessment is an opportunity for students to demonstrate mastery of the skills taught during a particular unit.</i></p> <ul style="list-style-type: none"> - Chapter Review - Mid-chapter Checkpoints - Chapter Test (Ch. 9) - Standards Assessment - Performance Assessment Task 		

- Reteach/Enrich Supplemental worksheets (to help classify different abilities)
- iReady Teacher Toolbox activities
- Small group direct instruction for struggling learners -One-on-one instruction (as needed)
- Communicating in pairs, small group, or whole group presentations
- Teacher observation
- Goalbook Pathways
- Standards Mastery

- Digital Personal Math Trainer
- iReady Diagnostic / Growth Check
- Ed Connect / Benchmark Test
- ECR – Extended Constructive Response
- PARCC- style assessments

Focus Mathematical Concepts

Districts should consider listing prerequisites skills. Concepts that include a focus on relationships and representation might be listed as grade level appropriate.
 Prerequisite skills: Students should be able to plot and locate a point on a coordinate grid. Students should be able to identify and classify geometric figures.

Common Misconceptions: Students confuse x and y on a coordinate grid. Students have a lack of geometric vocabulary.

Number Fluency (for grades K-5):

Grade	Required Fluencies
K	Add/Subtract within 5
1	Add/Subtract within 10
2	Add/Subtract within 20
3	Add/Subtract within 1,000 ; Multiplication and Division Facts 0-10
4	Fluently add and subtract multi-digit whole numbers using the standard algorithm; Multiplication and Division Facts 0-12
5	Fluently add and subtract multi-digit whole numbers; Multiplication and Division Facts 0-12; Add and Subtract Benchmark Decimals and Fractions

District/School Tasks

Exemplar tasks or illustrative models could be provided.

- Animated Go Math models
- GO Math iTools
- Grab and Go Differentiated activities (Go Math)
- Using technological resources and other 21st century skills to support and enhance mathematical understanding
- Using connections between pictures, oral language, written symbols, manipulative models, and real-world situations

District/School Primary and Supplementary Resources

District/school resources and supplementary resources that are texts as well as digital resources used to support the instruction.

- Interactive Student Edition
- Personal Math Trainer
- Math On the Spot video
- Real World Videos
- iReady Teacher Toolbox
- Illustrative Math <https://www.illustrativemathematics.org/>
- The Teaching Channel has two hundred math videos for professional development. <http://www.theteachingchannel.org>

Suggested Modifications

Below is a list of suggested modifications, accommodations, and enrichment opportunities. This includes, but is not limited to, :

1. English Language Learners.
 - a. Read written instructions.
 - b. Model and provide examples
 - c. Extended time on assessments when needed.
 - d. Establish a non-verbal cue to redirect student when not on task.
 - e. Students may use a bilingual dictionary.
 - f. Conversion chart
2. Special Education/504 Students.
 - a. Extended time on assessments when needed.
 - b. Preferred seating to be determined by student and teacher.
 - c. Provide modified assessments when necessary.
 - d. Student may complete assessments in alternate setting when requested.
 - e. Establish a non-verbal cue to redirect student when not on task.
 - f. Maintain strong teacher / parent communication.
 - g. Conversion chart
3. Gifted and Talented Students
 - a. Provide enrichment activities to expand upon the curriculum.
 - b. Use higher level questioning techniques in class and on assessments.

New Jersey Student Learning Standards - Technology

- 8.1.8.A.2 Create a document (e.g. newsletter, reports, personalized learning plan, business letters or flyers) using one or more digital applications to be critiqued by professionals for usability.
- 8.1.8.A.3 Use and/or develop a simulation that provides an environment to solve a real world problem or theory.
- Use of Edconent, iReady.
- This website offers exploration, practice and crafts. <http://www.mathcats.com>
- Use InspireData to create line graphs
- Plot data on Excel graph and determine mathematical patterns.
- Use these patterns to create mathematical shortcuts.
- Create blog post explaining mathematical shortcuts created by the students.
- Students can create iMovie on angles, lines, line segments, perimeter, area, and volume in the real world.
- Students can manipulate figures www.Mathisfun.com/geometry/quadrilaterals

Career Readiness Practices

- CRP1. Act as a responsible and contributing citizen and employee.
- CRP2. Apply appropriate academic and technical skills.
- CRP4. Communicate clearly and effectively and with reason.

- CRP6. Demonstrate creativity and innovation.
- CRP8. Utilize critical thinking to make sense of problems and persevere in solving them.
- CRP11. Use technology to enhance productivity.

NJSLS 9.2 - Career Awareness, Exploration, and Preparation

9.2.8.B.3 Evaluate communication, collaboration, and leadership skills that can be developed through school, home, work, and extracurricular activities for use in a career.

III. Additional Differentiation/Modifications for Teaching

Research-Based Effective Teaching Strategies	Additional Modifications for G&T	Additional Strategies for Special Education	Additional Strategies for English Language Learners
