## **Mission Statement**

The Township of Union Department of Visual and Performing Arts is committed to increasing opportunities for all students K-12 to participate in and understand the arts.

We all share the common belief that the arts are one of humanity's most eloquent means of understanding the world. Through the arts, we share the highest achievements of every culture and find a universal language which permits communication among all peoples. As such, the arts are an essential component of a complete education.

Through the years, studies have discovered that the inclusion of the performing arts in a broad-based curriculum improves the quality of a child's educational experience. The arts teach discipline, improve self-esteem, inspire creativity, and help young people to set and reach goals. Knowledge of the arts makes our district a challenging place where our children are encouraged to explore, to create, and to reach their full potential.

## **Vision Statement**

The arts are a critical and essential part of the education of every young person in America, and every American should have high-quality opportunities to be educated in all of the arts. Such an education should occur both in and out of classroom settings as part of an ongoing learning process for all individuals, including those with special talents or needs.

A comprehensive arts education draws upon the expertise of both arts specialists and classroom teachers, and upon the experiences and resources of professional artists and community cultural resources. Only by utilizing all of these resources can individuals achieve the full educational potential of the arts.

## **Statement of District Goals**

- **Develop reading, writing, speaking, listening, and mathematical skills.**
- **Develop a pride in work and a feeling of self-worth, self-reliance, and self discipline.**
- **Acquire and use the skills and habits involved in critical and constructive thinking.**
- **Develop a code of behavior based on moral and ethical principals.**
- **Work with others cooperatively.**
- **Acquire a knowledge and appreciation of the historical record of human achievement and failures and current societal issues.**
- **Acquire a knowledge and understanding of the physical and biological sciences.**
- **Participate effectively and efficiently in economic life and the development of skills to enter a specific field of work.**
- **Appreciate and understand literature, art, music, and other cultural activities.**
- **Develop an understanding of the historical and cultural heritage.**
- **Develop a concern for the proper use and/or preservation of natural resources.**
- **Develop basic skills in sports and other forms of recreation.**

## Course Description

This Elementary Art Education Curriculum Guide provides a description of information, objectives, procedures and materials. The guide is organized by grade levels kindergarten through second. All students will progress toward the basic literacy of the elements of art and principles of design. Students will learn how to effectively use art media and materials, and experience techniques that are associated with each. Interdisciplinary connections are stated where applicable.

Areas of content include the Elements of art: Line, Shape, Form, Value, Color, Space, and Texture, and the Principles of Design: Balance, Harmony, Unity, Emphasis, Proportion, and Rhythm/Movement.

Differentiated learning generates the format to include appropriate educational links to all aspects of study at the elementary grade level. Art history and cultural connections, as well as work readiness skills, are documented in written plans. New Jersey Core Curriculum Standards are included, noted and up to date. Accommodations and modifications are made for special needs.

Students have exposure to famous works of art and themes throughout historical periods and world cultures. In addition to the suggested activities in this guide, teachers may choose to enforce artistic skills through the inclusion of special poster contests, exhibits or displays, and/or holiday projects. Technology may be used for audio-visual education and/or research. Lessons may be enhanced with the use of computers, video cameras, CD/DVD programs, audio and video technology.

## GLOSSARY

**Archetypal work of art:** An artwork that epitomizes a genre of art.

**Art genres:** Artworks that share characteristic approaches to content, form, style, and design. Each of the four arts disciplines is associated with different genres.

**Arts media:** Artistic methods, processes, or means of expression (e.g., presentation mechanisms such as screen, print, auditory, or tactile modes) used to produce a work of art.

**Art medium(s):** Any material or technique used for expression in art. In art, "medium" refers to the physical substance used to create artwork. Types of materials include clay, pencil, paint, and others.

**Artistic processes:** For example, expressionism, abstractionism/nonobjectivism, realism, naturalism, impressionism, and others.

**Balance:** For example, in dance, complementary positions that are on or off the vertical, horizontal, or transverse axes.

**Basic Literacy:** A level of achievement that indicates a student meets or exceeds the K-5 arts standards. Basic Literacy is attained when a student can:

1. Respond to artworks with empathy.
2. Understand that artwork reflects historical, cultural, and aesthetic perspectives.
3. Perform in all four arts disciplines at an age-appropriate level.
4. Draw similarities within and across the arts disciplines.

**Competency:** A level of achievement that indicates a student meets or exceeds the K-8 arts standards. Competency is attained when a student can:

1. Respond to artworks with developing understanding, calling upon acquaintance with works of art from a variety of cultures and historical periods.
2. Perceive artworks from structural, historical, cultural, and aesthetic perspectives.

3. Perform in a chosen area of the arts with developing technical ability, as well as the ability to recognize and conceive solutions to artistic problems.
4. Understand how various types of arts knowledge and skills are related within and across the arts disciplines.

**Consummate works of art:** Expertly articulated concepts or renderings of artwork.

**Discipline-specific arts terminology:** Language used to talk about art that is specific to the arts discipline (dance, music, theatre, or visual art) in which it was created.

**Elements of art:** The compositional building blocks of visual art, including line, color, shape, form, texture, and space.

**Exemplary works:** Works representing genres of art that may be examined from structural, historical, and cultural perspectives.

**Formalism:** The concept that a work's artistic value is entirely determined by its form—the way it is made, its purely visual aspects, and its medium. The context for the work is of secondary importance. Formalism predominated Western art from the late 1800s to the 1960s.

**Historical eras in the arts:** Artworks that share distinct characteristics and common themes associated with a period of history.

**Media Arts:** For example, television, film, video, radio, and electronic media.

**New art media and methodologies:** Artistic works that have a technological component, such as digital art, computer graphics, computer animation, virtual art, computer robotics, and others.

**Principles of design:** Balance, proportion, rhythm, emphasis, and unity.

**Proficiency:** A level of achievement that indicates a student meets or exceeds the K-12 arts standards. Proficiency is attained when a student can:

1. Respond to artworks with insight and depth of understanding, calling upon informed acquaintance with exemplary works of art from a variety of cultures and historical periods.

2. Develop and present basic analyses of artworks from structural, historical, cultural, and aesthetic perspectives, pointing to their impact on contemporary modes of expression.
3. Perform in a chosen area of the arts with consistency, artistic nuance, and technical ability, defining and solving artistic problems with insight, reason, and technical proficiency.
4. Relate various types of arts knowledge and skills within and across the arts disciplines, by mixing and matching competencies and understandings in art-making, history, culture, and analysis in any arts-related project.

**Utilitarian and non-utilitarian art:** Art may be functional (i.e., utilitarian) or decorative (i.e., non-utilitarian).

**Visual communication:** The sharing of ideas primarily through visual means—a concept that is commonly associated with two-dimensional images. Visual communication explores the notion that visual messages have power to inform, educate or persuade. The success of visual communication is often determined by measuring the audience's comprehension of the artist's intent, and is not based on aesthetic or artistic preference. In the era of electronic communication, the importance of visual communication is heightened because visual displays help users understand the communication taking place.

**Visual literacy:** The ability to understand subject matter and the meaning of visual artworks within a given cultural context; the ability to communicate in a wide array of art media and express oneself in at least one visual discipline.
