

TOWNSHIP OF UNION PUBLIC SCHOOLS

Gifted & Talented Grade 3

Adopted February 15, 2022

Mission Statement

The mission of the Township of Union Public Schools is to build on the foundations of honesty, excellence, integrity, strong family, and community partnerships. We promote a supportive learning environment where every student is challenged, inspired, empowered, and respected as diverse learners. Through cultivation of students' intellectual curiosity, skills and knowledge, our students can achieve academically and socially, and contribute as responsible and productive citizens of our global community.

Philosophy Statement

The Township of Union Public School District, as a societal agency, reflects democratic ideals and concepts through its educational practices. It is the belief of the Board of Education that a primary function of the Township of Union Public School System is to formulate a learning climate conducive to the needs of all students in general, providing therein for individual differences. The school operates as a partner with the home and community.

Course Description

The purpose of the district program for the gifted and talented is to provide appropriate educational services for those students who have been identified as having or possessing exceptional abilities that are both dynamic and inclusive. Through a differentiated curriculum, both in depth and scope, these students will be challenged to maximize their potential. A safe, inclusive, and culturally responsive learning environment will be provided so that these individuals with gifts and talents become effective learners and develop social and emotional well-being

The Gifted and Talented program for the gifted students understands that language, culture, economic status, family background, and/or disability can influence the learning of individuals with gifts and talents. Through this understanding, opportunities are created by the staff to respond to the needs of the individuals. The gifted and talented program creates opportunities for students to see beyond that which is apparent to the average learner and be innovative and creative in their thinking. The emphasis in grades kindergarten through eight will be placed on developing the individual gifts and talents of the students within the program as we grow and evolve to meet their individual needs.
