Mission Statement

The mission of the Township of Union Public Schools is to build on the foundations of honesty, excellence, integrity, strong family, and community partnerships. We promote a supportive learning environment where every student is challenged, inspired, empowered, and respected as diverse learners. Through cultivation of students' intellectual curiosity, skills and knowledge, our students can achieve academically and socially, and contribute as responsible and productive citizens of our global community.

Philosophy Statement

The Township of Union Public School District, as a societal agency, reflects democratic ideals and concepts through its educational practices. It is the belief of the Board of Education that a primary function of the Township of Union Public School System is to formulate a learning climate conducive to the needs of all students in general, providing therein for individual differences. The school operates as a partner with the home and community.

Course Description

The grade three social studies curriculum is based on the New Jersey Student Learning Standards for Social Studies. The learning objectives serve as a framework of the social studies content and are the foundation for the course. These objectives state what content and processes students will be able to do at the conclusion of their social studies experience. Higher-level thinking processes have been incorporated into the objectives. In addition, lessons in friendship, respect, and tolerance have been included in conjunction with NJSA Holocaust/Genocide Education and the NJSA Amistad Curriculum. Teachers are encouraged to go beyond the standards and select instructional strategies and assessment methods appropriate for their students.
